

DEPARTMENT OF COMPUTER SCIENCE
PROGRAMME OUTCOMES OF POST GRADUATE PROGRAMMES
(2016 – 2017 onwards)

Name of the Programme: M.Sc., Computer Science	
PO 1	Understand, Analyze and design the concept of functional programming languages along with algorithm designing strategies for the efficient Computer System not only for the development of basic Computer System but also for the Client / Server Communication in the Networking.
PO 2	To demonstrate a depth of knowledge of modern technology related in the field of Mobile Technology, Operating Systems modern technologies are introduced for the students
PO 3	To gain the knowledge in the field of Data Science and train the aspirants to handle the Data in the special manner
PO 4	Student will able to Get good knowledge of the issues and challenges faced while doing the real-world Project. In order to enhance the knowledge of the students in the field of the network the Cloud technologies and the Sensor Networks are introduced.
