

## COMPUTER SCIENCE LABORATORY

The computer lab was established at the college in 2006 and has been operating with great attention to detail, providing for the academic requirements of the students. The college possesses four laboratories and are staffed by knowledgeable and helpful technicians who are available to assist students with any questions or issues they may have. The labs have high-speed internet connectivity, and all computers are equipped with the latest software and hardware. Software such as Dream Weaver, Wamp Server, MS Office, CorelDraw, Xampp, CAD( FT & CD), SQL Server, Tally, R Language, Adobe Photoshop, Page Maker, Dot Net, Python, Oracle, Matlab, SQL Server, among others, are installed to meet the needs of the students. The computers are equipped with K7 total security and other security measures to safeguard the data of students and instructors. The laboratory facilities offer students the opportunity to engage in online coursework, take virtual examinations, participate in video conferencing, and attend remote interviews. Web cameras and headphones were made available to accommodate the requirements of the students. Overall, the computer labs in the college are valuable resources for the students, providing them with the tools they need to succeed in their academic endeavours. The laboratory facilities are outfitted with an uninterruptible power supply (UPS) system that provides a 15-minute backup in the event of a power outage. Additionally, the labs are furnished with both generator and solar power capabilities. We are committed to maintain and upgrade the facilities to ensure that the students have access to the latest technology and resources.
